THINK HARD; ACCEPT LAW

Retaining all of their original opin lons regarding the authority vested in an acting city attorney, the registrars today have nevertheless decided to follow the legal views laid down by Arthur M. Comley, with respect to the registration of Progressives.

Not that this makes any difference in any practical way, for the course which the registrars decided on their own hook to take is the course which the acting city attorney said they should take,

That is, Republicans who sign s blank asking to be put on the Progressive list must be put there, un-less the registrars desire to formally

challenge the voter's purpose The Progressive list co such former Republicans as former Provate Judge Edward P. Nobbs, Horace H. Jackson and former Alderman Joseph L. Peabody.

If Progressives name their delegates as do the other political parties ft will be a rather difficult matter for them to get a ticket in the Eleventh district for only one voter is registered there. He is John H. Jolly, who lives at 530 East Main street. The Tenth and Twelfth districts have the largest registration, with 15 each. The lists of the Democratic, Repub-lican and Socialist parties will be ready for distribution early next week. No list will be prepared for the Pro-hibition party here.

In the Democratic and Republican lists the new registration is by far heaviest on the East Side of the river, especially in the Ninth and Twelfth districts. The Democratic registration is about double that of the Re-

THE WAR AND THE RUBBER AIN'T IT H-L?

Last Sunday we announced that the price of rubber had assumed inflated proportions, likewise that tires, out of sympathy, had followed suit on a smaller scale.

During the week a new phase has been put on the rubbery horizon by the statement of a well known tire concern, that they have withdrawn the advance in price of a week ago on their products. This is, of course, a most welcome blow to father and we hope that he will take due advantage of it.

At this time of writing rival tire manufacturers have neither in words nor action revealed any desire to follow suit. They are probably not playing in such luck as their competitor, who we understand, quite unexpectedly, came across a batch of rubber which most carelessly had been stowed away in the attic.

War is war and also h-l and heat in excess is bad for rubber, very bad, hence its scarcity.

We should like to look upon this tire question as a joke, but really conditions are not rosy. We are not so sure that the present prices will prevail for any length of time.

It would be just as well to take time by forelock and do your shopping

We have a full line of Goodyear, United States. Batavia and Kelly Springfield tires on hand interspersed with a few sizes of other makes. Strike while the iron is hot. Do it now.
